July 2023- Sept 2023

Worked as a front end developer at Solution One and gain experience on react and react bootstrap

EDUCATION

SAGARMATHA COLLEGE OF SCIENCE AND TECHNOLOGY
BSC.CSIT 2018-2023

SKILLS

Front-end Web Development Technologies
->HTML ->CSS - >JavaScript ->ReactJs ->React-Bootstrap / Tailwind-css

Back-end Web Development Technologies
->Nodejs ->Expressjs ->Database Management ->Version Control (Github)

MONGODB   MYSQL   Firebase

Java Programming Language
->Object Oriented Programming
->Data Structure and Algorithm
->Servlets and JSP
->Collection frameworks

PROJECTS

BLOG APP
->Creating a blog application with full-stack mern with jwt authentication.Where data is stored in mongoDB and uses Node and Express as backend.

TO-DO LIST
->Two projects using vanillaJS and ReactJS was used. This project I was solely focused on creating a to-do list using react-router dom for dynamic page rendering.

MOVIE SUGGESTER APP
->A full-stack application where movie suggestion is done using OpenAI package in npm. The backend technology used is nodeJS with mongoDB as the database, and ReactJS using create-react-app as front end.

NOTE APP
->A full-stack application where the user uploads the notes.

SHOE BRAND PAGE
-> A front-end page created using reactjs to understand the concept of react-bootstrap.

CONTACT MANAGER
->A front-end project where the user register a contact and the contact is added in the localStorage.

User Registration/Login and CRUDE Operation
->This project was build on core java using technologies like servlets and jsp. The hashing algorithm used to store data in MYSQL is base64. The UI component necessary was build using bootstrap. The IDE Eclipse was used to create the project.
